

Better than ever before!

The power upgrade for the Identity Manager from One Identity

The **Easy Content Solution (ECS) for One Identity** offers a certified, predefined **SAP risk rule set** for quick and audit-proof integration into the Identity Manager.

At the push of a button, companies receive a **ready-to-use** rule set for SAP authorisation checks and function separation analyses – without the need for costly in-house developments or adaptations.

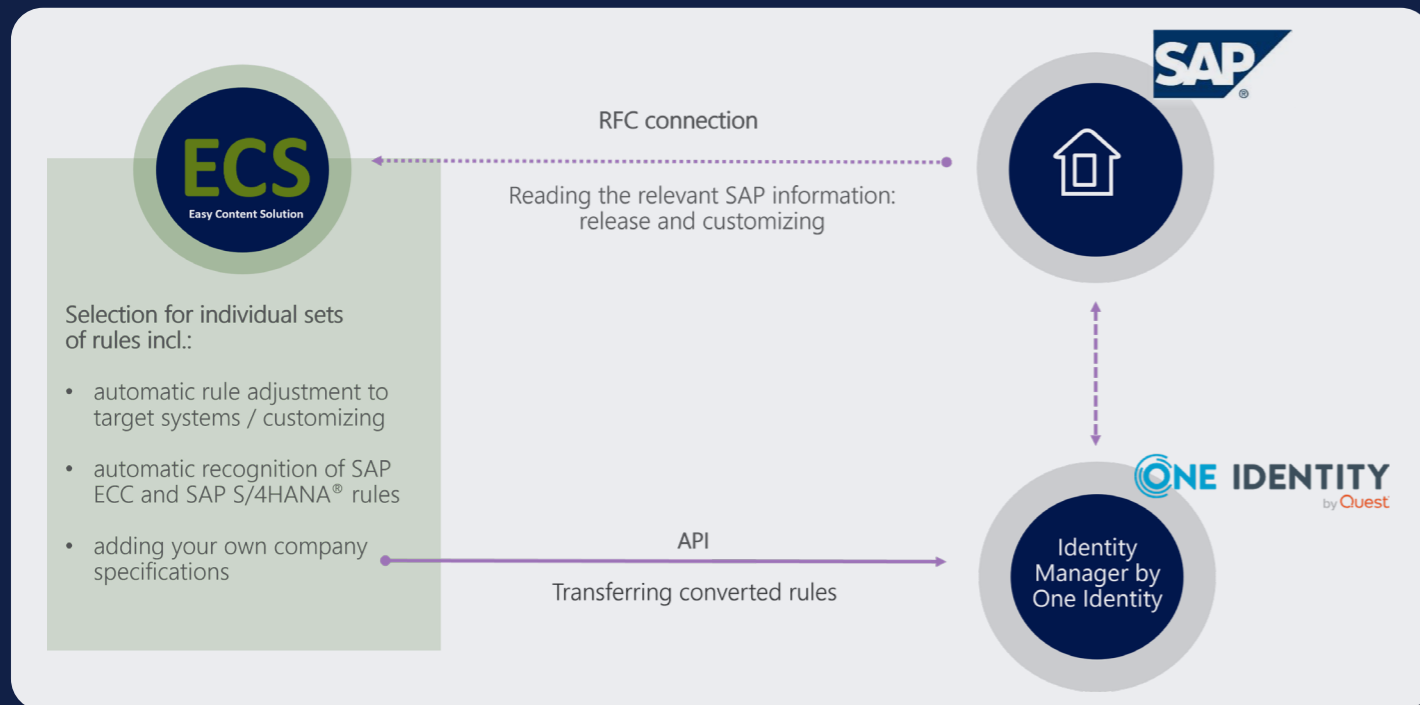

With **two updates per year**, your policies are always up to date and legally compliant. This way, you can efficiently implement compliance requirements and reduce risks when assigning SAP authorisations.

How does ECS for Identity Manager work in the IAM process?

- **Seamless integration:** the certified SAP rule sets are fully compatible with Identity Manager.
- **Intelligent customisation:** rule sets automatically adapt to your SAP systems (e.g. ECC or S/4HANA®).
- **Identify risks:** critical authorisations and function separation conflicts are immediately identified.
- **Comprehensive authorisation check:** more than 2,500 rules for the automatic analysis of SAP access rights.
- **Efficient compliance:** detailed assessment incl. recommended actions.

Product benefits at a glance

- **Predefined, certified SAP risk rule sets:** no manual adjustments necessary.
- **Integrated risk management:** detailed description including risk levels, impact assessments and recommended actions.
- **Efficient governance:** a uniform set of rules for all SAP systems ensures standardised compliance processes.
- **Central administration and maintenance:** one-time maintenance for multiple SAP systems.
- **Automatic adaptation to SAP updates:** always up-to-date and compliant.

Powerful and efficient to use

- **Ready to use:** rules can be transferred to Identity Manager without delay.
- **High acceptance:** rules are based on field-tested, externally certified best practices.
- **Increased efficiency of IAM processes for SAP:** direct authorisation checks and approvals.
- **Easy to use:** easy to understand and user-friendly expansion and customisation of rules.
- **No expert knowledge required:** can be used without prior knowledge.
